PROJECT

Welcome to Alimos!

Dear participants,

It is with great pleasure that I welcome you to Alimos for the 5th European event of the "GREEngaged Citizens" project. As the Mayor of Alimos, I am proud to host this significant gathering in our remarkable municipality.

Alimos, with a history and culture spanning over 5,000 years, is a place where the past intertwines with the present. We honor our heritage, which includes the legacy of Thucydides of Olorus Alimousius, the esteemed ancient Greek historian. Known for his work, "The History of the Peloponnesian War," Thucydides is recognized as one of the first true historians. His pioneering approach to historical causality and the search for deeper causes of events laid the groundwork for a scientific method of understanding history. This spirit of inquiry and reflection is an integral part of our identity here in Alimos.

As a coastal municipality along the stunning Greek Riviera, Alimos exemplifies the harmony between modern living and the natural environment. Our commitment to environmental sustainability and biodiversity is evident in our efforts to preserve our natural heritage. From our beautiful coastline to our well-maintained historical sites, we strive to create a seamlessly.

Welcome once again!

Andreas Kondylis  
Mayor of Alimos

Our environmental policies focus on fostering biodiversity and promoting sustainable practices within our municipality. We understand the vital importance of protecting our natural surroundings for the benefit of future generations. Through various initiatives, we encourage community participation in preserving our green spaces, reducing waste, and adopting eco-friendly habits.

Thank you for joining us. We are excited to embark on this journey together and collaborate toward a greener and more sustainable Europe.

## GREENGAGED CITIZENS: EUROPEAN NETWORK FOR LOCAL CLIMATE ACTION

CERV Programme  
Network of Towns

EVENT IV  
Alimos (Greece)

20-23 February 2025

The "GREEngaged Citizens" Project is an initiative promoted by the Municipality of Pinhel, Portugal, whose goal is to place municipalities and local entities at the center of climate action, transforming climate and environmental challenges into opportunities.

In line with the objectives of the CERV program, the project intends to promote the exchange of good local practices with other European citizens around the thematic proposal through intercultural dialogue, give the opportunity to discover other European realities, reinforce active participation in their peoples and support a society based on European values such as solidarity and cooperation. The strong point of the project is the representation of a current issue, which is key on the EU agenda.

In collaboration with 13 entities belonging to 13 different countries of the European Union: Holland, Slovenia, Spain, Italy, France, Malta, Greece, Slovakia, Hungary, Romania, Bulgaria, Lithuania and Latvia; The project will be held over a period of 20 months by holding 6 events.

During each of the events, there will be seminars, round tables, debates on the themes adopted, workshops, conferences with political representatives, case studies, exchange of practices, planning moments for future projects, cultural visits to museums, public entities, social and cultural, as well as foundations and NGOs with social purposes and documentary projections... which will have the objective of raising public opinion on the values of environmental protection, democracy, active participation, solidarity and cooperation.

The project will have a strong impact both locally and at the European level, thanks to the cooperation of the partners and the citizens of the participating localities, together with the territory throughout the entire life process of the initiative.
